PROFESSIONAL SUMMARY

Artificial Intelligence and Machine Learning (AI/ML) Engineering student with skills in Python, Machine Learning, Deep Learning, Data Science, and Web Development. Experienced in developing responsive applications, data analysis, predictive modeling, and AI-based projects. Strong problem-solving and analytical skills with a passion for building practical technology solutions.

TECHNICAL SKILLS

Programming Languages: Python, Java, C

Web Development: HTML, CSS, JavaScript, React.js, Node.js

Application Development: Android Studio, React

Database: SQL, Database Management

AI & Data Science: Artificial Intelligence, Machine Learning, Deep Learning, Natural Language Processing (NLP), Data Science

Core Competencies: Problem Solving, Data Structures and Algorithms, Debugging, Analytical Thinking, Teamwork, Communication

EDUCATION

B.E. in Artificial Intelligence & Machine Learning — SDMCET, Dharwad | 2023–2027 | CGPA: 7.86

12th Grade — Disha PU College, Kalaburagi | 2021–2023 | 88%

10th Grade — Aradhana English Medium School, Kalaburagi | 2021 | 94.56%

INTERNSHIP EXPERIENCE

Artificial Intelligence Intern | CODSOFT | 2026

Completed an Artificial Intelligence internship with practical exposure to Python and machine learning concepts. Worked on AI-based problem-solving tasks involving machine learning, computer vision, and natural language processing, while strengthening skills in model development, debugging, implementation, and analytical thinking.

AI/ML and Data Science Intern | InternPe Pvt. Ltd. | 2026

Worked on AI/ML and data science projects involving data preprocessing, data analysis, exploratory data analysis (EDA), and predictive modeling. Utilized Python, Pandas, NumPy, and Scikit-learn to process datasets, identify patterns, and develop machine learning solutions.

PROJECTS

Smart Hospital Appointment & Patient Management System

Developed a responsive web-based healthcare management application that streamlines appointment scheduling, patient information management, and doctor coordination. Designed an intuitive interface to improve accessibility and overall user experience.

Stay Finder of Real-Time Hostel & PG's

Developed a responsive web application for discovering hostels and PG accommodations. Implemented search and filtering functionality based on location, pricing, and user preferences to provide an efficient and user-friendly accommodation search experience.

Crop Disease Prediction

Developed an AI-based crop disease prediction system using machine learning and deep learning techniques. Applied image preprocessing and Convolutional Neural Networks (CNN) to classify crop leaf images and identify diseases, demonstrating knowledge of computer vision and predictive modeling.
